

**JobBOSS User Group Western PA
Meeting Minutes Wednesday February 13th 2008**

Our meeting opened at 1:00pm on February 13th, 2008 at the Franklin, PA Emerging Technology Center (ETC). We encourage users to come to our meetings, and bring co-workers even if they don't pre-register. We had several cancellations because of the weather today, but 4 companies braved the icy roads and made it.

We discussed the Exact Software Engage User Convention coming up in April 2008, in Las Vegas. We have some interest in attending from our group, hopefully some of members will attend and bring back info for us.

Dave Lechleitner from JobBOSS attended the meeting by Webex. Dave demonstrated the new module in Version 10.2, Work Flow. We also talked about scheduling changes coming in Version 11. Our May User Group meeting will focus on Version 11 in much greater detail.

Dave encouraged us to log into the Portal and check out the jobboss user forums to get more information about our any questions or issues we may be having.

Our next user group meeting is scheduled for Wednesday May 14th, 2008, 1:00 – 4:00pm in Franklin, PA. Thank you to Specialty Fabricating and Powder Coating in Franklin; they graciously pay for the rent for our meeting location. Thanks also to Atlas Precision for providing snacks for this meeting, and to Laser Tool for offering.

Please send your requests for future meeting topics to Jill & Judy (jill@leechcarbide.com / judy@leechcarbide.com).
